

# Special Care Cream

## Effectiveness\*:

- Improvement of skin barrier by **28,93 %**
- Improvement of skin redness by **73,82 %**
- Improvement of total extent of irritation by **48,31 %**

\*Test institute dermatest® Research Institute For Reliable Results

## Independent study to confirm the scientific effectiveness of Dr. med. Christine Schrammek Kosmetik **Special Care Cream**

Under dermatological supervision, a medical, dermatological report was developed over a 7-day application test to evaluate the regenerating effect of **Special Care Cream** after 5 days of skin irritation.

For this purpose, the test persons' skin was repeatedly irritated with the anionic surfactant SLS (1 % sodium lauryl sulfate) over a period of 5 days. Due to the irritation of the skin in the first place, a soothing of the irritated skin with and without **Special Care Cream** could be assessed afterwards.

**Aim of the study was to determine the soothing, anti-irritant and skin barrier-strengthening effect of Special Care Cream.**

## Study Design

■  7 days

■ Age = 26 – 54

■  10  
test persons

■  Test area:  
forearm

■  Application in  
the morning  
& evening

## Results

By treating the skin with **Special Care Cream**, the following results could be determined after 7 days, compared to the untreated skin area:

- Improvement of skin barrier by **28,93 %**
- Improvement of skin redness by **73,82 %**
- Improvement of total extent of irritation by **48,31 %**

## Conclusion

In summary, it can be concluded that **Special Care Cream** significantly supports the regeneration process of the skin barrier after 5 days of irritation and subsequent 7-day application. Thanks to the application of **Special Care Cream**, a considerable reduction of the extent of skin irritation/damage could be achieved in all measured parameters – compared to an untreated area.

**This confirms the strong soothing and skin barrier-regenerating effect of Special Care Cream.**

Test institute dermatest® Research Institute For Reliable Results

Additionally, a dermatological report was prepared – as done for every product by Dr. med. Christine Schrammek Kosmetik – which confirms the good tolerance of the product.
